

Kensington HPP Energy's Official Manufacturer's Certificate

Kensington HPP Windows Replacement Window Tax Credit Certification

The tax credit has been extended for 2019 and 2020 Tax Returns. This energy efficient home credit is only available to those taxpayers who did not claim the maximum \$500 worth of home energy tax credits in an earlier year. Pursuant to IRS Form 5695, if you received home energy credits from Tax Years 2005-2020, you must subtract the amounts you received from 2020's \$500 "lifetime" credit cap (the lifetime cap is \$200 for windows, not including installation).

In order to claim this energy credit on your return, you must have purchased the qualified improvements and placed them into service during the appropriate Tax Year. To qualify for the credit, the energy-saving improvements must have been made on an existing home (not a new construction) which was your primary residence, and which you owned. The home must also be located in the United States.

This document along with the window receipt showing that you purchased one of the models noted herein acts as the manufacturers certification that the windows purchased meet the guidelines required for this energy credit. IRS Form 5695 details the requirement as Energy Star 6.0 which each of the products noted meets or exceeds.

Home Improvements that Qualify for the Credit

Here are the various energy-efficient products which qualify for the credit, and the maximum amount that can be claimed for each:

- \$300 for biomass stoves
- \$50 for advanced main air circulating fans
- \$300 for air source heat pumps
- \$300 for central air conditioning
- \$150 for gas, propane, or oil hot-water boilers
- \$150 for gas, propane, or oil furnaces
- \$300 for gas, propane, oil, or electric heat pump water-heaters
- \$500 for energy-efficient doors (less installation)
- \$500 for energy-efficient skylights (less installation)
- \$200 for energy-efficient windows (less installation)
- \$500 for insulation (less installation)
- \$500 for metal or asphalt roofing (less installation)

Remember that only \$500 of all combined qualified costs may be credited.

Kensington HPP Energy certifies that all the Kensington HPP Windows products listed on this statement are eligible building envelope components of The Home Energy Tax Credits.

Under penalties of perjury, I declare that I have examined this certification statement, and to the best of my knowledge and belief, the facts are true, correct and complete.
